# SyGreen

## Sensitive, Specific, & Fast

qPCRBIOSYSTEMS SyGreen Mix combines a proprietary non-inhibiting intercalating dye with the latest advances in polymerase technology & buffer chemistry to give you fast, highly sensitive & reproducible real-time PCR.

## FrameStar®

### Two-Component PCR Plate

- Improve your consistency.
- Rigid polycarbonate skirt with polypropylene wells.
- Multiple well-frame colour combinations.
- Skirted, low or no-skirt format.
- Available in plate or strip format.

Cat#: 4TI-0960/B
